

## Follow Us On Twitter

What is Twitter? Twitter is a free web-based “social networking” service that makes it easy to send and receive small instant messages called Tweets. You can receive these on any computer browser or as text on your wireless phone. We will be updating our Twitter page regularly with news and late-breaking information such as school closings due to weather or public health or safety alerts related to our school. For more information on Twitter and how to set it up and use it on your PC, Mac or wireless phone (it must be able to receive text messages), please watch our tutorials:
